

Finance Systems Management Date: March, 2016

# **UNM Banner Finance Chart of Accounts Request Application**

# What is the Chart of Accounts Request Application?

The application allows a user to request the creation of a new chart element in Banner Finance such as a new index, new fund, new program, new activity, and new account code. A user can also request the termination of an index.

The application is designed to streamline the review process by facilitating electronic requests and approvals.

# **GLOSSARY**

#### FOPA Definitions – Fund-Organization-Program-Activity

#### Fund

- 1. **Unrestricted Funds -** Current Unrestricted Funds include resources of the University that are currently expendable for any purpose toward performing the primary objectives of the University. These include all funds received for which no stipulation was made by the donor or other external agency as to the purpose for which they should be expended; however, may be restricted by administrative policies. The primary source of these funds is state appropriations.
- Restricted Funds Current Restricted Funds include resources of the University that are currently expendable for any purpose toward performing the primary objectives of the University. These include funds available for financing operations, but which are limited by donors and other external agencies to specific purposes, programs, departments, or schools.
- 3. Loan Funds Loan Funds include resources available for and transactions related to loans to students. Loan Funds are divided into funds provided by the United States government and those provided by private gifts and other University funds.
- 4. **Endowment Funds -** Endowment Funds include those resources that are invested in accordance with donor restrictions.
  - a. <u>*True-Endowments*</u>, donors have stipulated that the principal of the gift is to remain in perpetuity and is to be invested for the purpose of producing present and future income.
  - b. <u>*Term-Endowments*</u> are similarly restricted, but only for a specified timeframe.
  - c. <u>Quasi-Endowments</u> are established by the governing board of the institution as opposed to external donor requests
- 5. **Unexpended Plant Fund -** Unexpended Plant Funds include funds for construction or acquisition of long-lived assets. This includes such items as land and building acquisition, construction of new facilities, renovation, and remodeling.
- 6. **Retirement of Indebtedness Fund -** Retirement of Indebtedness Funds are used to record the accumulation of funds and the related disbursement for repayment of long-term debt for assets.
- 7. Renewal and Replacement Fund R&R Funds are allocations for building upkeep.
- 8. **Investment in Plant Funds** Investment in Plant Funds are used to record the equity of campus assets. This subgroup in plant should reflect the total amount of resources expended for additions to assets.
- 9. **Agency Funds -** Agency Funds are used to record funds held by the University for outside groups who have a close relationship with the University. The University is acting as a custodian of these funds.

**Organization -** The Organization segment, a required field in Banner, represents a unit of financial responsibility. An organization is established for tracking financial activities of a financial reporting unit.

**Program -** The Program segment, a required field in Banner, is used to track the sources and uses of institutional funds by functional classification (purpose). This segment follows the NM Higher Education Department (HED) standards and supports institutional reporting.

**Activity -** The Activity segment is used to group and track revenues and expenditures as a single, generally non-permanent, occurrence that is not identifiable by any other accounting string segment. These are normally used to track specific events such as a conference being hosted by a UNM department. Also, in order to have more than one Index within the same Fund, Org, and Program combination, a new Activity code must be requested; this will be the distinguishing FOPA element for the new index.

**Index -** The Index code is a Banner field used as a short cut to default one or more segments of a Banner Accounting String (FOPA). Within the University's Chart of Accounts structure, the index code will be key to establishing and recognizing the appropriate use and the grouping of Banner segments.

**Account -** Designates asset, liability, equity, revenue, expenditure, and transfer account classifications.

**Accessing the COA Maintenance Application** 

To access the COA Application:

- 1. Go to http://fsm.unm.edu/index.html
- 2. Select Forms
- 3. Select the 'Chart of Accounts Request Application' link.
- 4. Login using your NetID and password.

# Tips and Assistance

#### Resources:

Please contact the Finance Systems at fsm@unm.edu.

If you have questions about which chart elements to use in your request, please contact your Fiscal Agent for guidance. Fiscal Agents website: <u>http://fang.unm.edu/</u>

The following Banner Finance forms can be queried for each chart element:

FTMACCI - Account Index Maintenance Form

FTMFUND - Fund Code Maintenance Form

FTMPROG - Program Code Maintenance Form

FTMORGN - Organization Code Maintenance Form

FTMACTV - Activity Code Maintenance Form

FTMACCT - Account Code Maintenance Form

To access the application, you must have the Department Chart of Account Requester security role. Approval for this role is routed to the Fiscal Agent.

Organization Codes cannot be requested in the Application. The "New Organization Request Form" must be submitted. Please see <a href="http://fsm.unm.edu/forms.html">http://fsm.unm.edu/forms.html</a>

#### Standards:

You cannot make changes to existing chart elements using the application. These are not allowed typically because it removes the ability for consistent historical reporting which must be maintained. Valid edit requests are rare and are processed only on an individual basis. If you need to make a change to an element, please send a detailed request to <u>fsm@unm.edu</u> for review. (Title changes to indexes that are for a new business purpose will be **disapproved**.)

Two indexes cannot have the same fund-organization-program-activity combination. Each index must have a unique combination of these elements.

A separate request for each new chart element must be submitted. For example, if a new activity is required for a new index, the activity must be submitted and approved separately prior to submitting a request for the new index.

Do not use all CAPS in a title. Titles of all chart segments are limited to 35 characters. Titles must be unique.

New index requests will be disapproved if they are for a business purpose that is already established in an account code. For example, an index request for 'Business Office Phone Charges' would be disapproved because an account code exists for phone charges.

#### Navigation:

All filtering and searches are case sensitive.

The percent sign "%" is used as a wildcard character.

If a field label is highlighted in **blue**, an existing List of Values (LOV) is available by double clicking in the field.

The 'Requestor Comments' field (limited to 100 characters) can be used to provide specific information related to the request.

If you submit a request in the COA application that needs modification before it's created in Banner, please email Finance Systems Management at <u>FSM@unm.edu</u>. Please provide the Request ID #, the change requested, and the reason.

Clicking "Exit" will always take you back to the previous menu.

Clicking "Exit" on the main menu will prompt a dialogue box that will ask you if you wish to leave the application.

# **Application Overview**

This is the first menu the user will see upon successfully logging into the application.

- A. The "COA Requests" button allows these request functions:
  - 1. Request a new index.
  - 2. Request a new fund.
  - 3. Request a new program.
  - 4. Request a new activity.
  - 5. Request a new account code.
- B. The "User Options" button allows these inquiry functions:
  - 1. View the status of a current request.
  - 2. Query for existing index information in Banner.

C. The "Acct Approvals" button is used to review and approve/disapprove requests. This is for Financial Services' use only.

D. The "FSM Approvals" button is used to process requests by Finance Systems Management only.

# How to Use the Chart of Accounts Request Application

#### Using the Index Lookup Feature

All elements of the index must exist in Banner before the request can be submitted. If you need a new fund, program, activity, or organization code, you must request these prior to requesting the index. If you try to request a new index that already exists with the same fund, program, organization code, and activity that you desire, then you'll receive an error message to change one of the elements. This prevents duplicate indexes and reporting problems in Banner Finance.

To avoid requesting a duplicate index, use the "Index Lookup" button to search whether the index already exists in Banner Finance. This function displays the FOPA (Fund, Organization, Program, Activity) combination of the index.

#### 1. Select User Options

- 5. The "Account Type" will automatically be populated when you submit your request. You cannot enter data in this field.
- 6. Make sure the "Data Entry" box is checked.
- 7. New account codes needed for unrestricted purposes are required to include a comment indicating the business purpose of the new account.
- 8. Click the "Submit Request" button and then click "OK" to finalize request.
- 9. Click the "Exit" button when finished.

#### **Request Index Termination**

Termination requests are submitted through Workflow. If you select the Term Index button you will receive the following message:

New Index	New Fund	New Progra	am New Activity	New Account	
Term Requests					
Term Index					
		Forms		×	
			ermination request using	workflow link- https:	
		1	/workflow.unm.edu		
				OK	

Select OK and return to FSM's website for a job aid on how to request an Index Termination.

#### How to track the status of a Request

If the request is not approved or it cannot be processed, the requestor will be notified by email.

After all approvals have been received; Banner Finance is updated with the new element. The requestor is notified by email, the email will include the number of the new chart element.

If you have not received an email, you can check status using the "User Options" button.

	1.	Click	"User	Options"	button.
